How does our solution work?

Our digital tool empowers clinicians to devote their full attention to you during visits, enabling seamless documentation of essential medical information to ensure a precise and complete record of your care.

Who has access to my information?

Only authorised medical staff! We adhere to Australian privacy standards and the Privacy Act. Our information systems are certified for strict data security, safeguarding your privacy.

Where is my data stored?

All data is securely encrypted and kept within Australian-based servers, meeting the local data jurisdiction regulations.

Is my consent required?

Absolutely. We require your consent to use our technology. You can provide it during your visit and revoke it anytime if you change your mind.

Are my appointments recorded?

No audio or video recordings are retained. Our technology transcribes notes in real-time, adding relevant information to your clinician's practice management system to maintain your health record.

How is my data used?

We are committed to:

Transparency: We clearly outline how your data will be used.

Minimal Collection: We only gather what's necessary to provide you with top-quality care and enhance our service.

Security: We strictly control access, usage, and retention of your data to ensure it remains protected.
